Offered exclusively by Langer Research Associates, PARC™ is an affordable and easy-to-use online application to organize, store and instantly access your organization's survey questions, toplines, analyses, reports, presentations and data with a few simple clicks.

Available on an annual subscription basis, PARC offers full-text word search of individual survey questions, programmed questionnaires and reports.

Question-level results are easily combined and exported to create new topline documents with fully trended results. Programmed questionnaires can be assembled with the assurance of consistent wording, structure, instructions and coding over time. PARC's search capability also is effective in managing qualitative reports, transcripts and other documents.

Search results are single-click linked to datasets, banner books, memos, spreadsheets, PowerPoint presentations, charts and any other project files, of any file type.

LANGER RESEARCH ASSOCIATES

SURVEY RESEARCH DESIGN · MANAGEMENT · ANALYSIS

PARC is hosted on the secure Microsoft Azure cloud platform with DigiCert SSL encryption. Individual users have access only to their own account files.

THOROUGH

Find the results of every survey question you've ever asked, any project, any time – and all associated project files.

SECURE

DigiCert SSL encryption and the Microsoft Azure platform keep your files safe and private.

FAST

Save time by instantly finding the materials you need, not digging through files and folders.

ACCURATE

Quickly construct topline documents and programmed questionnaires with complete, correct instructions and coding.

EASY TO LEARN

PARC's storage, search and retrieval functions are intuitive and simple to use.

FLEXIBLE

PARC is deployable enterprise-wide, at the team level or as a client-specific or public-facing service.

A GREAT VALUE

Our annual subscription pricing is quite reasonable. Please inquire!

Langer Research Associates is an Emmy- and Ogilvy-award winning team of senior survey research professionals. We specialize in the design, management and analysis of premium-quality, probability-based survey research for media, foundation, association and corporate clients. The company directs polling for the ABC News television network, produces a weekly survey of consumer sentiment for Bloomberg L.P. and specializes in in-depth research on health care, public policy, politics and international development, with a focus on best practices in sample and questionnaire design, rigorous statistical modeling and insightful analysis.

Institutional memory is not a system. **PARC** is.
